HTML AND NODE.JS

Pablo Bas Genís

First of all we have the main.html file and we load it into the local server. Then I modified the file to include the CSV:

CSV Data Viewer

Mission ID	Mission Name	Launch Date	Target Type	Target Name	Mission Type	Distance from Earth (light-years)	Mission Duration (years)	Mission Cost (billion USD)	Scientific Yield (points)	Crew Size	Mission Success (%)	Fuel Consumption (tons)	Payload Weight (tons)	Launch Vehicle
MSN-0001	Mission-1	2025-01-01	Star	Titan	Colonization	7.05	5.2	526.68	64.3	21	100.0	731.88	99.78	SLS
MSN-0002	Mission-2	2025-01-08	Exoplanet	Betelgeuse	Colonization	41.76	23.0	234.08	84.4	72	89.6	4197.41	45.72	Starship
MSN-0003	Mission-3	2025-01-15	Asteroid	Mars	Exploration	49.22	28.8	218.68	98.6	16	98.6	4908.0	36.12	Starship
MSN-0004	Mission-4	2025-01-22	Exoplanet	Titan	Colonization	26.33	17.8	232.89	36.0	59	90.0	2569.05	40.67	Starship
MSN-0005	Mission-5	2025-01-29	Exoplanet	Proxima b	Mining	8.67	9.2	72.14	96.5	31	73.2	892.76	12.4	Starship
MSN-0006	Mission-6	2025-02-05	Moon	Ceres	Colonization	13.69	8.8	452.42	45.1	42	100.0	1327.29	88.44	Ariane 6
MSN-0007	Mission-7	2025-02-12	Asteroid	Ceres	Research	1.02	5.0	220.38	44.7	74	95.5	211.2	42.07	SLS
MSN-0008	Mission-8	2025-02-19	Asteroid	Mars	Colonization	45.72	25.2	200.49	40.6	32	89.3	4600.53	39.34	SLS

As we can see here, the data of the CSV is loaded successfully into the local host.

Then I deployed the webpage using Vercel:

CSV Data Viewer

Mission ID	Mission Name	Launch Date	Target Type	Target Name	Mission Type	Distance from Earth (light-years)	Mission Duration (years)	Mission Cost (billion USD)	Scientific Yield (points)	Crew Size	Mission Success (%)	Fuel Consumption (tons)	Payload Weight (tons)	Launch Vehicle
MSN-0001	Mission-1	2025-01-01	Star	Titan	Colonization	7.05	5.2	526.68	64.3	21	100.0	731.88	99.78	SLS

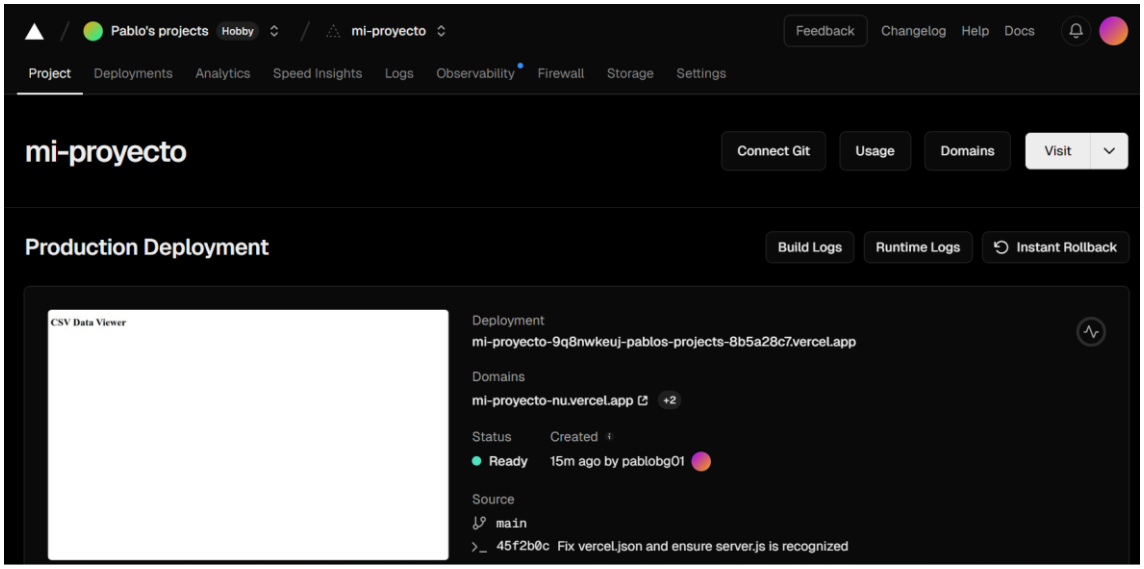
MSN-0007	Mission-7	2025-02-12	Asteroid	Ceres	Research	1.02	5.0	220.38	44.7	74	95.5	211.2	42.07	SLS
MSN-0008	Mission-8	2025-02-19	Asteroid	Mars	Colonization	45.72	25.2	200.49	40.6	32	89.3	4600.53	39.34	SLS

We can see that the data is deployed into the Vercel app. Also I deploy here the link so you can check the webpage: https://mi-proyecto-9q8nwkeuj-pablos-projects-8b5a28c7.vercel.app

I leave this screenshot too, to check that the project is on Vercel's app:



And I leave here the link to the repository on GitHub so you can check all the files and the CSV: https://github.com/pablobg01/csv-viewer-node
